

WORCESTER HOUSING AUTHORITY PARTNERS WITH QCC AND OPENS A COMMUNITY LEARNING HUB

Education is the gateway!

Worcester, MA, July 26, 2018 — The WHA has tremendous excitement and appreciation that QCC has invited WHA to be a partner in this initiative to establish Learning HUBS for QCC students which provides greater access and support for their studies. WHA knows the importance of higher education in establishing a pathway towards a viable career, and ultimately self-sufficiency. Education is the gateway!

For many of our students getting to campus to access the resource center, and library is very challenging, given parenting responsibilities and work. Having this Learning Hub with computers and a quiet space that will provide greater access and support to students is tremendous. This will definitely help students to be more successful!

WHA is pleased of the ability to contribute to this effort. WHA values their partnership with QCC and looks forward to continuing to work together to create A Better Life for Residents in the community. Through higher education and employment residents can become home owners and serve as successful role models for their children to emulate; changing not only their lives but the lives of their children and grandchildren.

Thank you to President Pedraja for making the Learning HUBS possible.
